Safety is

Our Business

RAIL SAFETY:

Rail Safety is a field to which all aspects of scientific & Technical knowledge pertaining to the safety are linked. It involves study of subjects that deals with the designing and installation of Fire protection systems, in depth understanding of the science of fire, its hazards and control measures; various associated engineering subjects; Industrial safety & management and other psychological grooming required to make a self-reliant safety personal

VISION & MISSION:

A rough assessment of the Indian Railways and other Industrial & Government demand puts the requirement at over 1,00,000 safety personnel every year. The stage is similar to the advent of the computer revolution 7 years back. Safety Engineering is a field to which all aspects of Science & Technical knowledge pertaining to safety is linked. It involves study of subjects that deals with the designing of safer fire resistant equipments and plants; in depth understanding of the science of Safety; its hazards and control measures in various associated engineering subjects; Managerial functions which aid in managing a fire fighting along with other psychological grooming required to make a self reliant Safety Engineer / Safety Officer.

AIRSC ACADEMY OF SAFETY AND DISASTER MANAGEMENT

focuses on all above matters to make them as experienced safety professionals. Till today, there is no proper awareness about safety. Many are hesitant to join just by thinking that it's a safety brigade related job; but the real fact is Quiet different. Nowadays, trained safety professionals are highly in demand. "Plethora of job opportunity exists in large numbers for safety students". An experienced safety candidate from a reputed institution can expect an immediate job opportunity and pay packages are anywhere between Rs.25000 to 45000 in India and around 2 to 4laks in abroad. AASDM has created history by placement.. Our major placements are in **INDIAN RAILWAYS PETROLEUM INDUSTRY, GOVT PSU SECTORS, AND MANY MORE AT ABROAD.**

MBA stands for Master of Business Administration and is a post graduate degree in business administration. The concept of MBA has become a prestigious and respected degree all over the globe, which is attracting people from various academic disciplines.

Most degrees are obtained with the purpose of advancing your career prospects and job opportunities. The same is the case with an MBA degree; the only difference being that an MBA degree is considered as the most valuable post graduate degree in the world and has exciting career opportunities. People take the MBA program in order to further their careers in their current jobs or to get a better job on the basis of their MBA degree.

Even within your existing company and in your current job, you can notice the difference in your career prospects pre-MBA and post-MBA. With an MBA degree under their belt, employees have a whole new world opened up to them and are elevated to managerial positions on the strength of the additional abilities and knowledge gained through the MBA program.

There is always an ever increasing demand for skilled managers in any organization or any institution in today's highly competitive world because only such skilled people can tackle the highly demanding situations that organizations faces in the area of liberalization and globalization.

Become Successful

A successful manager should possess a fine blend of qualities such as decision making, conceptual, analytical and interpersonal skills, for making the best possible use for the available resources. MBA programs are focusing on creating leaders and managers equipped with the above mentioned skills. MBA as an education makes one understand the language of business.

This is a program in which raw graduates will be changed to professional managers
