ACADEMY OF SAFETY & DISASTER MANAGEMENT
ISO 9001 : 2015, ISO: 45001:2018 CERTIFIED

Dear Students,

It is an honor and pleasure to serve for 2020-21.We are looking forward to another year of success for AIRSC ACADEMY OF SAFETY AND DISASTER MANAGEMENT A Unit Of ALL INDIA RAIL SAFETY COUNCIL.

With immense pleasure, I welcome you all to the AIRSC ACADEMY OF SAFETY AND DISASTER MANAGEMENT.

As we all are aware that the education system in the country is changing rapidly and hence the need of era is to provide skilled professionals and engineers to the country who will contribute in building modern India.

We are totally committed to provide excellent training for Safety Engineers and they will be trained in a wide range of skills related to firefighting, safety measures and other key areas for the Railways, Metro Rail Projects, High Speed Rail Projects, and oil & gas industries and for various govt sectors etc.

It is being continuously noticed that engineers of the above courses are very much in demand for employment in the supply of service industries, and we are associate with reputed organizations so that they may come to our campus to recruit their staff directly amongst our students.

We would like to ensure all our student and aspirants that the entire learning at our college would be centric, result oriented and best among the similar like-minded institutions.

We wish you all best of luck and prosperous career with us.

Dr, R.Padmanabhan

J.S. UNIVERSITY

Our vision is to build up a trusted leader in safety management through the development of technical staff excellence, establishing a high level of ethical practice and working with clients to meet their safety objectives. We value and respect.

WHAT IS SAFETY COURSE?

Safety is a general subject .It is linked with all fields of the world, be it Railways, Industrial, Marine, Aeronautical, Petrochemical or any other field. Safety is connected to the word "Prevention". Safety officer's job is to prevent accidents. Difference between the safety officer and the fire officer is that, "The safety officer has to act before the accident", inside the company and with employees to safe guard or prevent accidents. But "The fire officer acts only after accidents or rescue operations are only after the accident". Which is important? Of course, "Prevention is better than cure". ATRI offers MBA Safety management, MBA Disaster Management, B.Tech Safety Engineering, Diploma and PG Diploma courses in Safety to make them prepare for safety field and to become safety professionals but not to become fire officers. Without knowing the safety concept, many institutions blindly offer fire and safety courses in India and provide fire related practical and drill training. But the real fact is, no student gets job in safety field or safety brigade.

AIRSC ACADEMY OF SAFETY AND DISASTER MANAGEMENT mainly focuses on theoretical Knowledge about safety. It includes all type of accidents. Each safety personnel should know how to act before accidents, preventive methods for which theoretical knowledge about all subjects, PPT presentation, First Aid Training, Industrial visits, practicals, seminars, Language skills, etc., are very important. He/she should be a very good observer, have good communication skills, safety related general knowledge, management, operation and designing skills are very important. Experience in Safety field should be his "first job". He has to study the site or Departments's nature of job to prevent accidents and to study this, he has to get into the practical job environment.

AIRSC

ACADEMY OF SAFETY & DISASTER MANAGEMENT

ISO 9001 : 2015, ISO: 45001:2018 CERTIFIED

We inspire, inform and influence the global engineering and technology community to engineer a better world.

With multiple high speed rail and metro projects a high priority for economies in the India and around the world over the coming decades and an existing international infrastructure of railways under increasing pressure, high quality graduates are in high demand and a railway related degree opens access to a wealth of exciting international employment possibilities

We're committed to attracting and retaining the right talent, by providing an environment where our students can develop a fulfilling career. So, if you're motivated to make progress and ready to take the initiative, there are lots of opportunities to grow and go further with us.

With regular discussions with your line manager you'll be able to build your own career roadmap, indicating your professional ambitions and interest in moving across our organization. You'll also have opportunities to develop your skills and knowledge through practical, on-the-job training.

AIRSC ACADEMY OF SAFETY AND DISASTER MANAGEMENT

Rail Education was founded in 2012 and offers training to employes within the railways in India; this applies to contractors as well as infrastructure managers and railway companies.

Based on the motto "your education, your safety", we want to send a clear signal that our educators and instructors dress staff with safety-classified content as best as possible in order to be able to solve their tasks with a focus on security as a natural part of the work.

We offer the best education and training on the market for staff working on and at the railway, always based on the needs of the company and its employees. We can educate according to the company's own educational material or deliver new, tailor-made - all as needed and further agreed. If the need is only resources in the form of instructor, subject teacher, , we also have the opportunity

CERTIFICATE COURSE IN

METRO RAIL TECHNOLOGY

Mode: Full Time

Duration :6 months

Why this course?

» This programme is one of its kind and only handful of institutes offer such training programmes whereas there is huge shortfall of trained manpower in this area

» The Programme and Curriculum has been designed by several experts who have worked in respective fields of Railway and Metro Technology for many decades.

» We offer basic training to fresh graduate engineers from Civil, Mechanical, Electrical and Electronic & Telecommunications in basic Railway and Metro Technology as a common curriculum to enable gainful employment.

» The candidates then can join respective branches in the Metro Rail organization.

Key Features:

» Content delivery to be done by experts in the field

» Visits to Railway and Metro Installations

» Visits to Railway Equipment Manufactures Facilities

» Special content delivery by persons who have reached pinnacle in respective fields of railway and metro

» Visiting faculty from railway equipment manufacturing sector

Employability & Career Pathways:

» Various Metro Rail projects being executed in India, Possible additional qualification to candidates appearing through UPSC for Indian Railway Service of Engineers.

Eligibility Criteria:

» Graduate from a recognized University in Mechanical, Electrical, Electronic & Telecommunications and Civil Engineering branches.

» BCA/MCA, BSc and MSc - Electronics, Physics, Computers, etc .

Course Content in Brief:

The Course covers fundamentals of

» Introduction to Railways and Track Technology

» Railway Traction Mechanical

» Railway Traction Electric

» Railway Rolling Stock

» Signal and Telecommunication Technology

» Metro Rail Technology

» Project
